

The City of Russellville is hosting a  
**RIBBON CUTTING CEREMONY**

At our newly improved Playground at City Park.

Please plan to join us at the Playground

**4:00 PM, WEDNESDAY, JUNE 18, 2025**

13213 Park Street, Russellville, MO 65074

This community project was made possible through the award of funding through the Missouri Department of Natural Resources Scrap Tire Material Grant Program.

The \$27,223.53 grant provided new pour-in-place fill material for the City Park Playground, replacing the existing pea gravel surface, with the stipulation that the playground surface material be made from old tires, composed of at least 40% Missouri tires.

The new surface improves safety by providing a soft cushion, designed to help prevent injuries should a child fall, and improves access for wheelchairs and strollers.

The City awarded the contract for the installation of the fill material to All Inclusive REC, LLC, Farmington, Missouri, with site preparation provided by Klingele Dirtworks and Concrete and PeopleService staff.

**We invite you to join us as we celebrate the  
completion of this important City Park Improvements Project.**
